

March 20, 2020

The Town of Inuvik would like to express a **BIG THANK YOU** to residents, businesses and staff for their cooperation during this difficult time. This cooperation will assist in reducing the risk of COVID-19 from getting a foothold in our community.

The Town continues to be in contact with the GNWT for any new information and will provide ongoing updates.

We are looking for ways to assist the community and will make announcements about those efforts in the coming days.

Inuvik has always been and continues to be a generous and resilient community. We encourage everyone to help elders and those who, because of circumstances, have made the positive choice to self-isolate for the protection of others.

The Town continues to encourage everyone to follow the proper hygiene procedures, especially washing your hands with soap and water for a minimum of 20 seconds, and to practice social distancing. See below for links to official resources.
